ROKiT OFF Boxed Kits:

Motorcycle Cleaning Kit

Everything you need to clean and protect your motorcycle.

In a single, well priced multi-pack box.

A concentrated wash, use small amounts and wash many times.

Rapid Clean & Protect, an outstanding product that creates a protective, hydrophobic, super smooth surface finish.

With a brush to get in all the places to clean.

Plus 2 x micro-fibre cloths to apply.

And an expanding sponge for washing.

Contains:

Motorcycle Cleaner / Wash – 500ml Bottle....effective cleaner, concentrated to use small / 2 x cap-full amounts in a bucket for many washes.

Rapid Clean & Protect – 500ml Trigger Spray....wipe on with one cloth, and buff with dry cloth to create a protective, hydrophobic, super smooth surface finish.

2 x Micro-Fibre Cloths – Premium micro-fibre cloths for use on all painted motorcycle surfaces. One for wiping on the Rapid Clean and Protect and the second for buffing after application.

Cleaning Brush – for use with the Motorcycle Cleaner in difficult to reach areas, such as between the spokes.

Expanding sponge – Premium long-lasting sponge that is perfect for use on motorcycles. It is ready for permanent use after being submerged in water for 5 minutes.

Helmet Care Kit

Everything you need to look after your lid.

In a single, well priced multi-pack box.

Interior, exterior helmet and visor cleaners.

Plus a micro-fibre cloth to apply.

Contains:

Helmet & Visor Cleaner - 250ml Trigger Spray – spray and wipe to clean your lid.

Helmet Lining Deodoriser – 500ml Trigger Spray...bactericide spray, simply spray throughout the inside of the helmet to kill the source of odours and freshen.

Anti-Mist Spray – 75ml Pump Spray –spray on visors and goggles to prevent fog, wipe on with a cloth and leave to dry.

Micro-Fibre Cloth – Premium micro-fibre cloth for use on all helmet exterior and interior surfaces.

ROKiT OFF Boxed Kits:

Motorcycle Premium Ceramic Pack

Everything you need to create 3 layer surface protection against grime, dirt and scratches. In a single, well priced multi-pack box.

A concentrated Ceramic wash, wash the bike to create the first layer of protection.

Ceramic Spray, created for motorcycles and flexible for fairings, wipe on and buff to activate a second protective layer.

Rapid Clean & Protect, an outstanding product that creates a third protective, hydrophobic, super smooth surface finish. Wipe on and then buff to activate the third protective layer.

With an expanding sponge for washing.

Plus 2 x micro-fibre cloths to apply Ceramic Spray & Rapid Clean.

Contains:

Ceramic Bike Wash – 500ml Bottle.....in warm water.....water begins to bead as soon as this is used.

Dura Seal Ceramic Spray – 500ml Trigger Spray.....creates a ceramic layer that protects surfaces against traffic grime, heat, water and scratches.

Rapid Clean & Protect – 500ml Trigger Spray.....use regularly after applying Ceramic Wash and Spray to create 3 layer surface protection.

2 x Micro-Fibre Cloths – Premium micro-fibre cloths for use on all painted motorcycle surfaces. One for wiping on the Rapid Clean and Protect and the second for buffing after application.

Expanding sponge – Premium long-lasting sponge that is perfect for use on motorcycles. It is ready for permanent use after being submerged in water for 5 minutes.

Anti-Corrosion Pack

Everything you need to protect your motorcycle against even the

Use regularly and always before winter / long term storage....for protection and easy to start again.

In a single, well priced multi-pack box.

Dura Coat Anti-Corrosion spray – proven in tests to outperform even the widest used passenger aircraft product ACF-50.

Cleaner Degreaser – strong cleaner but kind to surfaces, removes even stubborn grime and grease.

Fuel System Treatment - prevents fuel separation, moisture build up in tank and deposit build up in injectors, carburetor and valves.

Contains:

Dura Coat Anti-Corrosion – 500ml Trigger Spray....spray on or wipe onto all surfaces for protection against the elements and rusting.

Cleaner Degreaser – 500ml Trigger Spray....diluted or straight, it effectively cleans.

Fuel System Treatment – 250ml Bottle....add to fuel.....cleans and protects from the inside.

Product Descriptions and How to Use

Page 3 of 7

Motorcycle Cleaner/Wash 500ml Bottle – a pH neutral motorcycle wash / shampoo which is safe to use on all motorcycle surfaces.

- Non-Caustic, but highly effective, so won't cause corrosion or oxidation.
- Removes dirt without being a degreaser – won't remove our Anti-Corrosion product which is designed to stay on the surface.
- Super concentrate so only needs 2 or 3 capfuls per wash.

How to Use:

Mix 2 or 3 capfuls with warm water in a bucket and apply using sponge or brush. Rinse with clean water after use and dry.

Rapid Clean & Protect 500ml Trigger Spray – A highly effective, non-abrasive cleaner that is safe to use on motorcycle paintwork and plastics.

- Doesn't require water and uniquely leaves a protective coating on your paintwork.
- Will not damage water-based paint, unlike most polishes and cleaners.
- Creates a very hydrophobic super smooth protective layer to disperse water quickly and effectively, making future cleaning easier.

How to Use:

Simply spray on, wipe clean with a micro-fibre cloth and then buff with another (dry) micro-fibre cloth to activate and provide the perfect protective layer and super smooth finish.

Use as often as you like to clean your bike.....regular use builds up the protective layer for greater protection.

Ideal for use after our motorcycle wash or in between washes.

Ceramic Bike Wash 500ml Bottle - a high performance, pH neutral Ceramic motorcycle wash / shampoo which is safe to use on all motorcycle surfaces.

- Non-Caustic, but highly effective, so won't cause corrosion or oxidation.
- Leaves a protective ceramic base layer on your bike that is highly hydrophobic.
- Perfect for use with our Dura Seal Ceramic Spray.
- Unique product created for the motorcycle market.
- Super concentrate so only needs 2 or 3 capfuls per wash.

How to Use:

Mix a few capfuls with warm water in a bucket and apply using sponge or brush.

Rinse with clean water after use and dry. For best results, apply our Ceramic Spray for an industry leading, long lasting additional layer of protection.

Please note that due to its Ceramic content this will create less soapy foam than our motorcycle cleaner but is just as effective.

Dura Seal Ceramic Spray 500ml Trigger Spray – A high-performance, premium ceramic spray-on protection coating created specifically for the motorcycle market.

- Created for flexible fairings of motorcycles and will not crack when flexed.
- Provides a highly hydrophobic protective layer for motorcycle paintwork.
- Very simple to use – spray on, wipe in and buff off.
- Lasts for 3 to 6 months when used with Ceramic Bike Wash and Rapid Clean and Protect.
- Helps prevent swirling damage and creates an additional strong protective layer against the elements

How to Use:

Simply spray on a clean dry surface, wipe on with a micro-fibre cloth and then buff with another (dry) micro-fibre cloth to activate and provide the perfect ceramic protective layer. For best results use alongside our Ceramic Bike Wash and Rapid Clean and Protect.

Ideally use every 3 months to maintain protective layer.

Product Descriptions and How to Use

Page 4 of 7

Dura Coat Anti-Corrosion 500ml Trigger Spray – Market leading, long-lasting high-performance corrosion and rust inhibitor.

- Proven in independent tests to massively outperform ACF-50, the widely used commercial aircraft grade corrosion inhibitor.
- Creates a highly hydrophobic layer of protection.
- Protects against moisture, salt spray and other corrosive elements.
- Suitable for all bike surfaces, metal, and non-metal.
- Safe to use on electrical connections.
- Can also be used as a metal cleaner when applied to a cloth first

How to Use:

Spray directly onto the surface in a sweeping and even motion or onto a cloth or brush to apply directly to smaller areas.

Wipe off any excess liquid. Drying times will vary depending on ambient and environmental conditions and thickness of application.

Apply once prior to winter storage or apply at least once a month when riding in wet conditions.

Can be used as a metal cleaner when applied to a cloth and then wiped across surfaces to remove dirt. Will then leave a protective coating.

Avoid contact with tyres and the brake system.

Always try on an inconspicuous area on coated surfaces prior to use.

Cleaner Degreaser 500ml Trigger Spray - an all-purpose cleaner degreaser for use on motorcycles.

- Suitable for all painted or non-painted motorcycle frame and engine parts.
- Quick and easy to use. Either neat on heavily soiled surfaces or diluted for general use.
- Can be diluted up to 10 parts water to 1 part cleaner degreaser.

How to use:

As a general cleaner, dilute up to 10 parts water to 1 part cleaner degreaser then spray direct onto the required surface or onto a cleaning cloth.

Wipe clean as necessary, and rinse with clean water.

For degreasing use neat and spray direct onto the required surface and clean with a brush or cloth.

Then rinse with water. Always apply Dura Coat Anti-Corrosion afterwards.

Fuel System Treatment 250ml Bottle - A fuel system treatment: 1) conditions and stabilises fuel and protects against corrosion inside the tank 2) cleans injectors, valves and carburetors when added to fuel and the engine is run preventing deposit build-up and assists easy starting after winter storage.

- Stabilises fuel to protect against moisture build up inside your tank and fuel system.
- Prevents deposit build-up and assists easy starting after winter storage
- Can be added direct to the fuel tank at 1% to 2% dilution
- Will treat up to 25 litres of fuel

How to Use:

Can be added direct to the fuel tank at 1% to 2% using the following ratios: For 1% mix 100 parts fuel to 1 part Fuel System Treatment. For 2% mix 50 parts fuel to 1 part Fuel System Treatment.

Will treat up to 25 litres of fuel.

Product Descriptions and How to Use

Page 5 of 7

Helmet & Visor Cleaner 250ml Trigger Spray – for use on the outside of the helmet and visor.

- Can be used on gloss or matt finishes
- Safe for use on all motorcycle helmets and visors

How to use:

Just spray on and wipe clean with a microfibre cloth to remove dirt and bugs.

Can be left on for up to 1 minute before being wiped off to remove stubborn marks or bugs.

Helmet Lining Deodoriser 500ml Trigger Spray - for use on the interior of the helmet.

High-quality water based cleaner combining disinfecting and air freshening properties that effectively kill bacteria and eliminate odours.

- Prevents harmful bacteria build-up, ensuring protection against erosion of helmet lining and crumbling of interior pads.
- Keeps your helmet lining and interior clean and smelling fresh.
- Safe on all fabrics including leather, suede and cotton.

How to Use:

Spray directly onto the helmet lining / cheek pads. Leave to dry before wearing helmet again.

Repeat if necessary for strong odours. Use as often as you like to keep your helmet smelling fresh and in top condition for longer.

Anti-Mist Spray 75ml Pump Spray – for use on the inside of visors and goggles to prevent misting.

- Long lasting and smear free.
- Easy to apply.
- Should not be used with Pin-Lock.

How to Use:

Just spray on the inside of your visor or goggles and allow to evaporate. Wipe any excess with a cloth.

Rain OFF 250ml Pump Spray - Industry leading ceramic technology, using the latest hydrophobic water beading technology for rapid dispersal of water droplets to enhance visibility in rainy conditions. The ceramic surface layer allows the droplets to just roll away.

- Ceramic visor and goggle rain repellent....creates a hydrophobic ceramic layer.
- Vital for riding safely in wet conditions.
- Rain runs off as you ride.
- Safe for all goggles, visors and motorcycle windscreens.

How to use:

Ensure the application area is dry and clean before use. Apply generously and leave between 1-2 minutes. Remove residue by buffing using a micro fibre cloth. Repeat for ultimate high performance.

Product Descriptions and How to Use

Page 6 of 7

Bug & Tar Remover 250ml Trigger Spray - Safe and highly effective easy formula designed to clean off bugs, bird lime and tar spots from paintwork, fairings, plastics and mirrors.

- Proven to work at removing stubborn marks and contamination
- Leaves streak free finish

How to use:

Spray directly onto the spots to be removed, allow to soak in for 30 seconds or more and then remove by lightly rubbing the area.

For heavy tar spots a second application may be required.

Safe for all types of motorcycle paint finishes.

For best results apply ROKiT OFF Rapid Clean and Protect after use.

Wheel Cleaner 500ml Trigger Spray - A safe and concentrated wheel cleaner for all types of motorcycle wheels and rims. It effectively removes greases, oils, and brake dust residues on the rims and does not damage paints or coatings.

- To be used on wet wheels to maximise coverage.
- Concentrated formula so use a small amount each time.
- Easy to apply and quick to use.

How to use:

Can be diluted 1:3 parts water depending on required strength.

Spray onto wet wheel and leave for no more than 1-2 minutes Then rub with a cloth, brush or sponge if needed.

Rinse thoroughly with clean water. Repeat for heavily soiled areas

Chain Cleaner 500ml Trigger Spray - High performance de-greasing chain cleaner that effectively removes grease, dirt, grime, chain oil, wax residue and drive chain contaminants. Leaves your chain clean and ready for application of ROKiT OFF Chain Lube.

- Safe to use on all chain types.
- Comes in a trigger spray for maximum value.....no wasted can space like aerosols.
- Excellent in workshops and for home use.

How to use:

Shake before use and generously apply over the drive chain and leave between 1-2 minutes. For heavy soiling agitate with a brush and rinse. Repeat if necessary.

Apply ROKiT OFF chain lube immediately after use.

Chain Lube Aerosol 200ml and 400ml Aerosol - All-weather high-performance chain lube that penetrates chain links for long lasting lubrication, extends chain life and prevents corrosion.

- Suitable for all chain types
- Available in 200ml and 400ml options
- Comes with application tube for ease of use
- Perfect for workshops and home use

How to use:

Ensure drive chain is clean and dry before application. Apply moderate amount of lube to the inside of the chain. Remove any excess.

Product Descriptions and How to Use

Page 7 of 7

Boots & Textile Cleaner 500ml Trigger Spray - Highly effective multi-purpose cleaner for all your textile and leather motorcycle kit.

- Breaks down dirt and grime for easy cleaning, leaving your kit looking clean and fresh.
- Easy to use and very effective
- Suitable for leather and textile jackets, trousers, gloves and boots
- Removes bugs, dirt, bird lime and tar spots

How to use:

Simply spray on, leave for 1-2 minutes, dab and wipe with a cloth to remove residue. Repeat for dirtiest areas.

Brake Cleaner 500ml Trigger Spray and 500ml Aerosol - An advanced high power Brake Cleaner that removes oil, tar, grease, brake fluid and other contaminants. Prevents brake squeal, glazing and frees brakes.

- Safe to use around all brake components.
- Can be used as clutch cleaner.
- Available as trigger spray or aerosol.
- Excellent in workshops or home use.

How to use:

Spray generously over brake or desired area. Allow to dry. Collect residue in a cloth or drip tray. Remove any excess using a clean micro fibre cloth.

Snow Foam 1l or 5l bottle - A luxury, thick Snow Foam formulated to be used with a foam lance to remove dirt and grime from all bike surfaces.

- A safe to use pH neutral formula that's safe to use on all motorcycle surfaces
- Motorcycle specific formula
- Can also be used through manual Snow Foam applicator when diluted

How to use:

To be used via a power washer or snow foam lance.

Can be diluted up to 1:20 parts water depending on level of dirt. Add to the detergent compartment of the machine or the container attached to a snow foam lance. The power washer will blend the snow foam, water and air concentration automatically producing a thick blanket of foam. Agitate dirt with sponge or brush where necessary. Rinse off with water.
