

IMPORTANT NOTE
PLEASE READ BEFORE INSTALLING THIS KIT

Please Note

This K046 kit includes two different right hand crank seals. The CRSE-052 fits the older Honda OE and Hot Rods crankshafts and has an inside diameter of approximately 29mm to match the smaller, non-sleeved shaft. The CRSE-4060 fits the newer, updated version Honda OE and Hot Rods crankshafts and has an inside diameter of approximately 34mm which fits the sleeve that is installed on these crankshafts. Please check your crankshaft prior to installation and select the appropriate seal for your application. Failure to install the correct seal will result in engine damage.
