SILKOLENE PRO PREP SPRAY

A high quality hard surface cleaner.

Description

SILKOLENE PRO PREP SPRAY is a high quality water repellent, hard surface conditioner which provides a micro barrier against dirt and unwanted deposits.

Application

SILKOLENE PRO PREP SPRAY gives that elusive "factory finish" and also ensures smooth operation of plastic moving parts. Helps to waterproof and insulate ignition systems. SILKOLENE PRO PREP SPRAY is safe to use on all exposed bodywork to make cleaning easier and helps restores the colour and finish of plastics and painted surfaces. SILKOLENE PRO PREP SPRAY also retards metal corrosion and inhibits the further adhesion of dirt and mud. Ensure location is well ventilated. Spray evenly from 6 to 8 inches (15 to 20 cm) away. Wipe surface with clean lint free cloth and buff until dry. NOTE: Contains silicones: Do not use where painting is carried out. Do not use on windscreens.

Advantages

- Excellent surface finish.
- Short term corrosion protection.
- Do not spray on a naked flame or any incandescent material and follow the safety information on the label.
- Water-resistant.

Notes

The information contained in this product information is based on the experience and know-how of FUCHS LUBRICANTS (UK) plc in the development and manufacturing of lubricants and represents the current state-of-the-art. The performance of our products can be influenced by a series of factors, especially the specific use, the method of application, the operational environment, component pre-treatment, possible external contamination, etc. For this reason, universally valid statements about the function of our products are not possible.

Our products must not be used in aircraft or spacecraft. Our products may be used in manufacture of components for aircraft or spacecraft if they are removed without residue from the components prior to assembly into the aircraft or spacecraft.

The information given in this product information represents general, non-binding guidelines. No warranty expressed or implied is given concerning the properties of the product or its suitability for any given application. We therefore recommend that you consult a FUCHS LUBRICANTS (UK) plc application engineer to discuss application conditions and the performance criteria of the products before the product is used. It is the responsibility of the user to test the functional suitability of the product and to use it with the corresponding care.

Our products undergo continuous improvement. We therefore retain the right to change our product program, the products, and their manufacturing processes as well as all details of our product information sheets at any time and without warning, unless otherwise provided in customer-specific agreements. With the publication of this product information, all previous editions cease to be valid. Any form of reproduction requires express prior written permission from FUCHS LUBRICANTS (UK) plc.
